Crystal Rig IV Wind Farm Road Closure

Dear Resident,

As you will be aware, we are currently constructing the Crystal Rig IV wind farm. This includes making several alterations to the local road network between the A1 Junction and the Crystal Rig site entrance, to allow us to transport turbine components.

We require to close a section of the road completely from **8am Monday 12th May, reopening at 5pm Monday 26th May**. This is detailed on the map below, along with the diversion, which will be signposted.

Any changes to the dates above will be communicated on the weekly text and email alerts, the Crystal Rig IV website and through local signage.

During the road closure, Fred. Olsen Renewables will significantly reduce any HGV movements for Crystal Rig IV construction to assist with traffic management.

If you have any questions or comments about this closure, please contact
