Crystal Rig IV Wind Farm Escorted Deliveries

Dear Resident,

As you will be aware, we are currently constructing Crystal Rig IV Wind Farm. We are now ready to move the turbine components to the site.

Deliveries will begin week commencing 16th June and will continue until the end of August. The deliveries will consist of the following:

- Tower sections and blades will be delivered under Police Scotland escort and between the hours of 9pm – 7am. Please note that deliveries are subject to change due to operational delays. There will be approximately three components delivered each night. This equates to a total of 24 deliveries that arrive to site under Police Scotland escort.
- Other components, including the nacelle (hub of the turbine) will not require police escort. There will be approximately three components delivered each night. This equates to a total of 10 deliveries.
- The transformer will be transported to site on 23rd June. This will not be Police escorted but due to the size, it will move slowly.

We will provide weekly updates on the estimated days and times of escorted deliveries via text and email alert service. We will also share the schedule of abnormal load deliveries on our website and Facebook page.

Please be aware that the delivery schedule can change at short notice, and the best way to stay up to date with this is via the text and email alert service.

You can sign up to the text or email alert by
